

February 28, 2007

Dear Sunshine Reform Task Force Members:

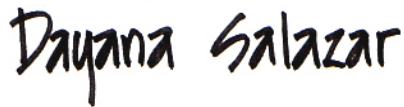

I am a concerned citizen and I reside in downtown San José. As an urban planning professor at San José State University, I have also participated extensively in neighborhood planning activities in collaboration with communities throughout the city.

Recently, it was brought to my attention that the Sunshine Reform Taskforce Members will be looking at providing the public with more information when major subsidies are going to be given to companies that want to locate in San José. I strongly support Bob Brownstein's proposal to apply clear standards when more than \$1 million in public subsidies is going to be awarded to a company.

During these times when money is tight, it is important that subsidies generate good return to the community and that the city has the ability to compare all proposals on equal footing. Setting clear standards is the only way that the city will be able to conduct a comprehensive comparison of all submitted proposals.

If you have any questions, please do not hesitate to contact me at (408) 293-8992 or by email at [salmar@pacbell.net](mailto:salmar@pacbell.net).

Sincerely,

A handwritten signature in black ink that reads "Dayana Salazar". The script is cursive and fluid, with the first name "Dayana" and last name "Salazar" clearly distinguishable.
